To whom it may concern:

We were in need of an excellent website designer and were lucky to find Ethane Technologies, I highly recommend Mr. Gaurav Sharma of Ethane Technologies (ethanetechnologies.com). He created and implemented my company's vision throughout our website, and all in only 2 weeks, which was 3 weeks less than what it would take for other companies to complete the project.

Over all Ethane Technologies is a "service oriented" professional company. Both Mr. Atul Chaudhary and Mr. Gaurav Sharma were easy to work with and they have an excellent ability of implementing ideas, concepts and changes, all at a very reasonable rate for such high-end website implementation.

I will recommend Ethane Technologies to all of my clients who are looking to create a professional website and/or SEO project.

Sincere Regards,

Michael Kermani
