

To whom it may concern,

I was looking for a firm to help me with reputation management services. I had used a company based in the United States and got pretty mediocre results. A friend suggested that I try to find a company in India to help me. My friend had once had very good results by using a couple of firms in India to help him with search engine optimization for his business.

I did a search for companies in India that did reputation management. I contacted Lalit Sharma after I found his company's link. I was a little sceptical and nervous about trusting and using a company in India, so far away. Lalit assured me that everything would be fine and that he and his company were very trustworthy. Lalit agreed to work with me and told me that I could expect results fairly quickly.

Well, he was correct. He hit his first milestone within about a week and then hit each remaining milestone quickly as we achieved our goal.

If you are reading this letter and considering the use of a company for either search engine optimization or reputation management, then I would strongly recommend using Lalit Sharma & his company Ethane Web Technologies Pvt Ltd's services.
